

TARUN KISHORE

Software Quality Assurance Engineer (SQA)

+91-9748758584 | kishoretarunuem@gmail.com | LinkedIn | GitHub | Bengaluru

Professional Summary: Software Development Engineer in Test (SDET) with 4+ years of experience in quality engineering across Banking and FinTech platforms. Specialized in building scalable automation solutions using Selenium with Java, BDD Cucumber, and API validation with Rest Assured and Postman. Demonstrated success in optimizing regression cycles by 60%, strengthening CI/CD pipelines, and ensuring release stability within Agile/Scrum environments.

Technical Skills:

Automation: Java, Selenium WebDriver, Playwright, Cypress, Tosca, TestNG, Cucumber (BDD), TDD, Maven, POM, SQL

Testing: Rest Assured, Postman, SoapUI, Functional, Regression, Smoke, Sanity, Mobile Testing (Android/iOS)

CI/CD & DevOps: Jenkins, GitHub, Bamboo, Azure DevOps

Testing Types: Functional, Regression, Smoke, Sanity, API, Cross-Browser

Cloud & Tools: Jira, BrowserStack, Git

Project: UAD (Unified Agent Desktop)

April 2021 – Oct 2025

Client: PSCU

- A contact center solution from PSCU (Payments Credit Union Service Organization), supporting agent workflows, customer interactions, and transaction handling.
- It supports end-to-end agent workflows including customer lookup, service requests, and payment-related operations.
- Architected and maintained a Maven-driven Selenium Java BDD framework leveraging Cucumber, TestNG, and POM.
- Accelerated release cycles by reducing manual regression effort by over 60%.
- Enabled seamless contact center operations for financial services and payment transactions.

Roles and Responsibilities:

Quality Engineering Analyst – Accenture

Jun 2022 – Oct 2025

- Analyzed business requirements and transformed user stories into precise test scenarios and estimates.
- Performed multi-layer validation including UI, functional, smoke, sanity, and regression testing across sprint cycles.
- Logged, monitored, and tracked defects using JIRA, ensuring adherence to defect lifecycle standards.
- Engineered robust Selenium WebDriver automation suites using Java, Cucumber BDD, TestNG, and POM.
- Streamlined end-to-end business process validation through automation-driven coverage.
- Verified backend integrations by executing API validation via Postman and SoapUI.
- Orchestrated cross-browser and headless test executions utilizing BrowserStack.
- Deployed automated test suites into CI/CD pipelines through Jenkins and GitHub.
- Collaborated with cross-functional teams during sprint ceremonies to ensure release readiness.
- Delivered sprint demos and analytical quality reports to stakeholders and clients.

Quality Engineering Associate – Accenture

April 2021 – May 2022

- Structured and executed regression cycles to safeguard release stability.
- Authored test scenarios aligned with banking compliance and domain standards.
- Enhanced Selenium automation scripts to strengthen end-to-end system reliability.
- Audited database transactions through SQL queries to validate data consistency.
- Contributed actively to Agile ceremonies, ensuring alignment with sprint objectives.
- Coordinated with global teams to meet delivery timelines with uncompromised quality.

Education:

B.Tech – Computer Science and Engineering (CSE)

Jun 2015 - Jul 2019

- University of Engineering and Management, Kolkata

CGPA – 7.73

Higher Secondary (CBSE 12th – PCM)

Jun 2013 - Jul 2015

- AL-Momin International School, Gaya, Bihar

66.40%

Secondary (CBSE 10th)

Jun 2012 - Jul 2013

- AL-Momin International School, Gaya, Bihar

CGPA – 8.4

Language Proficiency:

- English
- Hindi
